

Coding Station - CDS

- **Create contract parker cards** Easy and simple to generate contract parker passes.
- **Multiple ticket production** Automatically produce a large number of pre-programmed tickets.
- **Password protection** The coding station is very flexible in terms of password protection.

The Coding Station is a "Back-office" station that allows administration staff to create batches of encoded tickets and cards such as discount tickets, day/week passes etc. It is ideal for creating multiple tickets for shopping centre discounts and visitor or congress tickets for business centers, tradeshows, conferences and conventions.

Product description
